<p>2.64 [New] Security Cameras on University Premises</p>	<p>NMSU Chief Information Officer, in consultation with the NMSU Police Chief and other University Administrators as needed.</p>	<p>New policy adopted to authorize, and require coordination for, the use of security cameras to be placed on university premises. Initiated by ASNMSU due to vandalism occurring in various parking lots. The task force led by IT discovered that there were approximately 200 security camera systems in use throughout the NMSU system; best management practices suggests having a policy, with separate implementing procedures and forms in place to provide guidance relating to acquisition, operation, maintenance and safekeeping of security cameras and the images captured, as well as to protect individuals' reasonable expectations of privacy.</p>	<p>UAC: 04.09.13 BOR: 05.10.13</p>

Even if the reported "behavior of concern" does not rise to a high level of concern/safety risk, a university response to it typically has a beneficial impact by assisting the individual who, more often than not, needed some form of help or direction, which is consistent with best practices for student success and safety in the workplace.</p>	<p>UAC: 04.09.13 BOR: 05.10.13</p>
